

## Charts

Bar Chart a

Bar Chart b

Pictogram c

Number of pets owned by children in Year 4

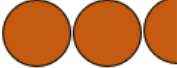

Pets	Total
Rabbit	
Cat	
Dog	
Guinea Pig	
Other	

Key:

 = 2 children

Pictogram d

Favourite Sport

Pets	Total
Football	
Tennis	
Rugby	
Netball	
Other	

Key:

 = 4 votes

## Arithmetic

1.  $9,604 - 821$

2.  $11.5 - 2.4$

3.  $803 + 100$

4.  $\frac{2}{5}$  of 40

## Practice: Comparison, Sum and Difference

5. Recap: What operation would you use for these words:  
sum, difference, altogether, total, how many more

6. Look at bar chart a.  
How many votes were there altogether?  
How many votes were there for lions and giraffes?

7. Look at bar chart a.  
How many more children voted tigers than elephants? How many fewer children voted giraffes than tigers?

8. Look at bar chart b.  
Which two drinks were voted for by 27 children altogether? How many children voted for water and lemonade?

9. Look at bar chart b. What's the difference between votes for orange squash and water? How many more children liked lemonade than blackcurrant squash?

10. Explain why it is important to have a key with a pictogram.

11. Look at pictogram c.  
 $\frac{1}{8}$  of the children have which pet?

12. Look at pictogram d.  
How many children voted altogether?

13. Conall says that in bar chart a, the difference between tigers and lions is 3 votes. Is this right? Explain.

## Challenge

14. The answer is 4.

Using any of the bar charts or pictograms, what could the question be?  
Give three examples.

You might want  
to talk to an adult

## Answers

Q no.	Question	Answer
1	$9,604 - 821$	8,783
2	$11.5 - 2.4$	9.1
3	$803 + 100$	903
4	$\frac{2}{5}$ of 40	16
5	What operation would you use for these words: sum, difference, altogether, total, how many more	Addition: sum, altogether, total Subtraction: difference, how many more
6	Questions about bar chart a.	30, 12
7	Questions about bar chart a.	4, 3
8	Questions about bar chart b.	Lemonade and orange squash, 17
9	Questions about bar chart b.	10, 4
10	Explain why it is important to have a key with a pictogram.	The key on a pictogram shows the value for the symbols used in the pictogram. Without the key, it is impossible to know the total each symbol represents.
11	Questions about pictogram c.	Rabbit (5 out of 40 children)
12	Questions about pictogram d.	60
13	Is this right? Explain.	Conall is incorrect. He has not used the scale and has counted three horizontal lines. The actual difference between tigers and lions is 7 votes.
14	The answer is 4. Using any of the bar charts or pictograms, what could the question be? Give three examples.	Answers will vary. Example answers: Bar chart a - how many votes for lions were there? Bar chart b - what is the difference between votes for blackcurrant squash and lemonade? Pictogram c - If one fewer child had a rabbits, how many children would have rabbits? Pictogram d - How many votes does each circle represent?
